

EXAMPLE OF DOSING TO COVER DAILY REQUIREMENTS WITH EQUITONIK®

HORSE (FEMALE OR MALE) WEIGHING 450 kg, WITH INTENSE PHYSICAL WORK (60 MIN/DÍA)*							
DIET	FORAGE (kg)		CONCENTRATE (kg)		SUPPLEMENT (kg)		TOTAL (kg)
TRADITIONAL	7	+	FLAKED GRAIN	5.5	FLAKED/PELLET	1	= 13.5
MODERN	7		EXTRUDED GALOPE®	3	EXTRUDED EQUITONIK®	0.500	= 10.5

*Daily intake of Dry Matter: 2.5% of live weight (90% Dry Matter).

COLTS, EQUITONIK® can be used as follows:

- From weaning (5-6 months), up to one year of age: 400 to 600 g/100kg live weight.
- Remember that by one year of age, a colt should achieve 50% of its adult weight and 80% of its adult height.

*GALOPE® REPRODUCTORAS

EQUITONIK® is balanced based on the concentrate feed intake (feed concentrate recommended based on the mare's physiology), forage and type of physical activity done. The main and most important ingredient of a diet is an excellent forage.
